The von Neumann architecture, which is also known as the von Neumann model and Princeton architecture, is a computer architecture based on the 1945 description by the mathematician and physicist John von Neumann and others in the First Draft of a Report on the EDVAC. This describes a design architecture for an electronic digital computer with parts consisting of a processing unit containing an ...

Defining architecture. While the central concept in the Standard is architecture description, it was unavoidable that such a document could escape offering a definition of architecture as well.. This page presents the definition and discusses its rationale. For discussion of other terms used in the Standard, see the [conceptual model].3.2 architecture (system) fundamental concepts or ...

Consider a simpli?ed version of an Inception module that only uses one size of convolution (e.g. 3x3) and does not include an average pooling tower (?gure2).
