A natural monopoly is a monopoly in an industry in which high infrastructural costs and other barriers to entry relative to the size of the market give the largest supplier in an industry, often the first supplier in a market, an overwhelming advantage over potential competitors. This frequently occurs in industries where capital costs predominate, creating economies of scale that are large in ...

## [Reforming Japan's Electricity Sector](#)

Tue, 22 Oct 2013 23:54:00 GMT

Japan is one of the few industrialized nations that have not fully deregulated their electricity sector. Ten regional electricity monopolies control most power generation, transmission, and distribution networks, and only large-scale consumers can choose their electricity provider. As Japan grapples ...
