Water is the chemical substance with chemical formula H_2O ; one molecule of water has two hydrogen atoms covalently bonded to a single oxygen atom. Water is a tasteless, odorless liquid at ambient temperature and pressure, and appears colorless in small quantities, although it has its own intrinsic very light blue hue.

Morten: You are absolutely correct in your suspicions. Any properties database or Equation of State that predicts a liquid phase for CO2 at atmospheric pressure (on planet Earth, at least) isn't worth the paper it is printed on.

Wed, 18 Apr 2018 04:30:00 GMT

Surface tension is the elastic tendency of a fluid surface which makes it acquire the least surface area possible. Surface tension allows insects (e.g. water striders), usually denser than water, to float and stride on a water surface.
