Quantum dot - Wikipedia
Sun, 15 Apr 2018 15:47:00 GMT
Quantum dots (QD) are very small semiconductor particles, only several nanometres in size, so small that their optical and electronic properties differ from those of larger particles.

itoh research group at Keio University
Sun, 15 Apr 2018 12:40:00 GMT
Special Presentation. Prof. H. Bracht from the Institute of Material Physics at the University of Münster, Germany, gives a special lecture entitled:
Nanotechnology - Wikipedia
Fri, 13 Apr 2018 12:00:00 GMT
Nanotechnology ("nanotech") is manipulation of matter on an atomic, molecular, and supramolecular scale. The earliest, widespread description of nanotechnology referred to the particular technological goal of precisely manipulating atoms and molecules for fabrication of macroscale products, also now referred to as molecular nanotechnology.
